Development Plan (Please note there are two integration options)

- Avalara creds
- Add Fonteva Items records to Avalara Portal
- Configure US States that are taxable
- Integration Options
 - Copy Integration pattern used by SOA Tax Manager (**LOE: 60hrs** development)
 - Use [Avalara Tax API](#) to send the additional details required
 - Get the calculation response
 - Create the Fonteva Adjustment Tax Item records
 - [Tax Exemption Certificates](#)
 - If Avalara doesn't provide LWComponent for it we would need to create one
 - LWC button that will redirect to Avalara guest portal with user creation for tracking purposes
 - LWC to visualize that user exempt certificates (ideally just redirect to the User certificate page)
 - (If Available) Install Avalara Connector (Portal -> Integration Tab) (**LOE: 50 hrs** development)

Manage integrations

Integrations are a secure way to exchange sales data between your business apps and Avalara products and get the

Account ID 2006505273

Account name Society Of Actuaries

My integrations All integrations License keys

Integrations for real-time sales tax calculation

Installed version 10.2.0

Salesforce B2B & D2C Commerce Lightning

Integration	Avalara company	Last activity
company 9.18store_c25a8...	Society Of Actua...	--

If possible, enter the Integration section within the left sidebar

and verify at the bottom if there's any information that is Salesforce related

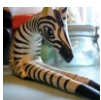

- Perform the initial sync (might need to create Salesforce Product records mimicking the Fonteva Items)
- Install Avalara Mapper
- Add Fonteva objects/products/shopping cart to the Avalara Mapper Static Resource XML
- Verify if the integration/calculation is going to work
 - If it doesn't work out use the approach used on SOA

[@TanyaR](#) We need access to their avalara see what kind of connector they have

3 . Tanya Renne March 17, 2026 at 18:25

Remember that they don't have one. We have to tell them what to ask for. And that needs to be what is most appropriate for connecting t

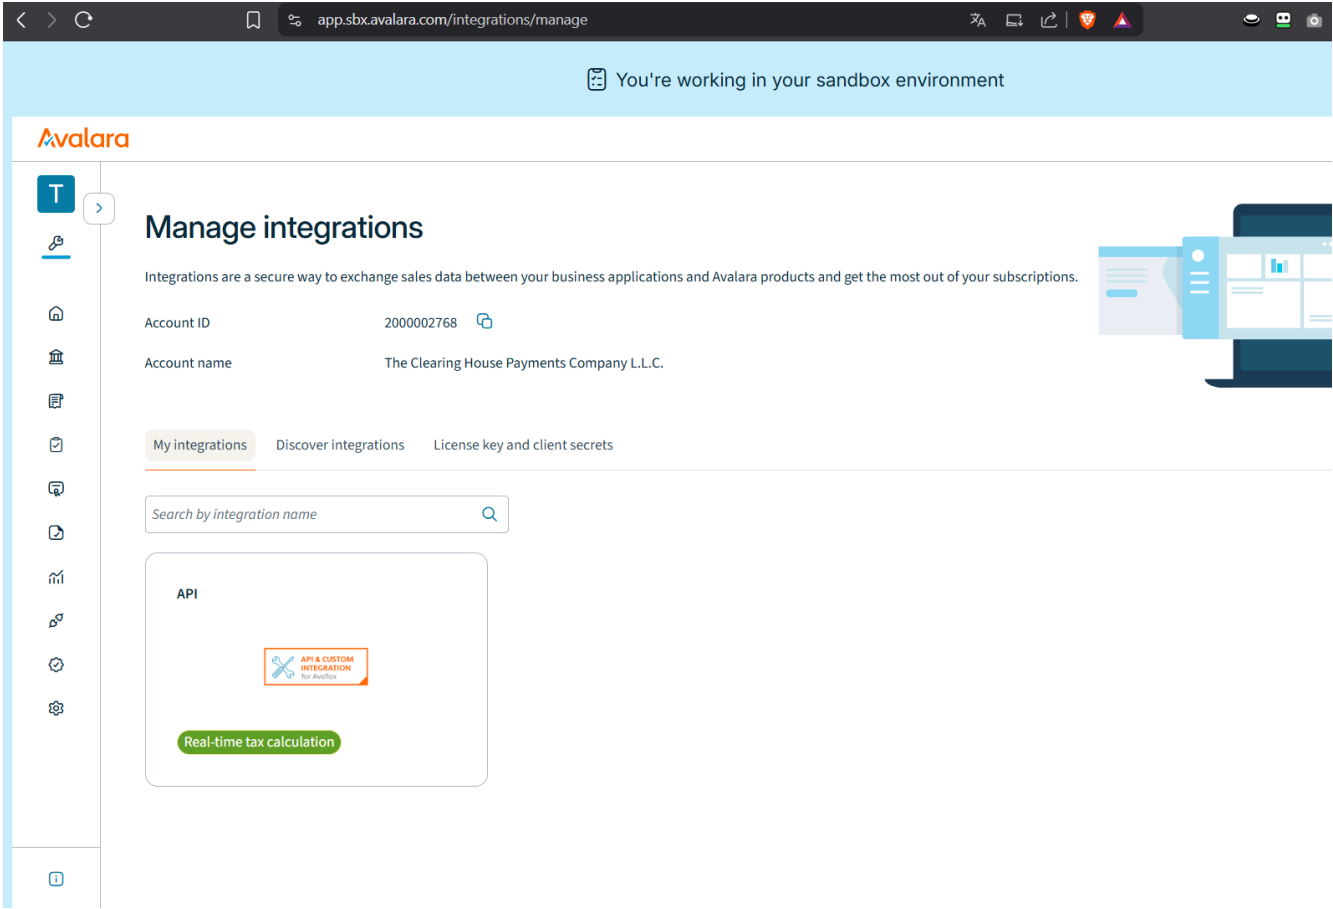

4 . Rodolfo Garcia April 30, 2026 at 14:49

Hi @NolanB , as discussed here are my current findings:

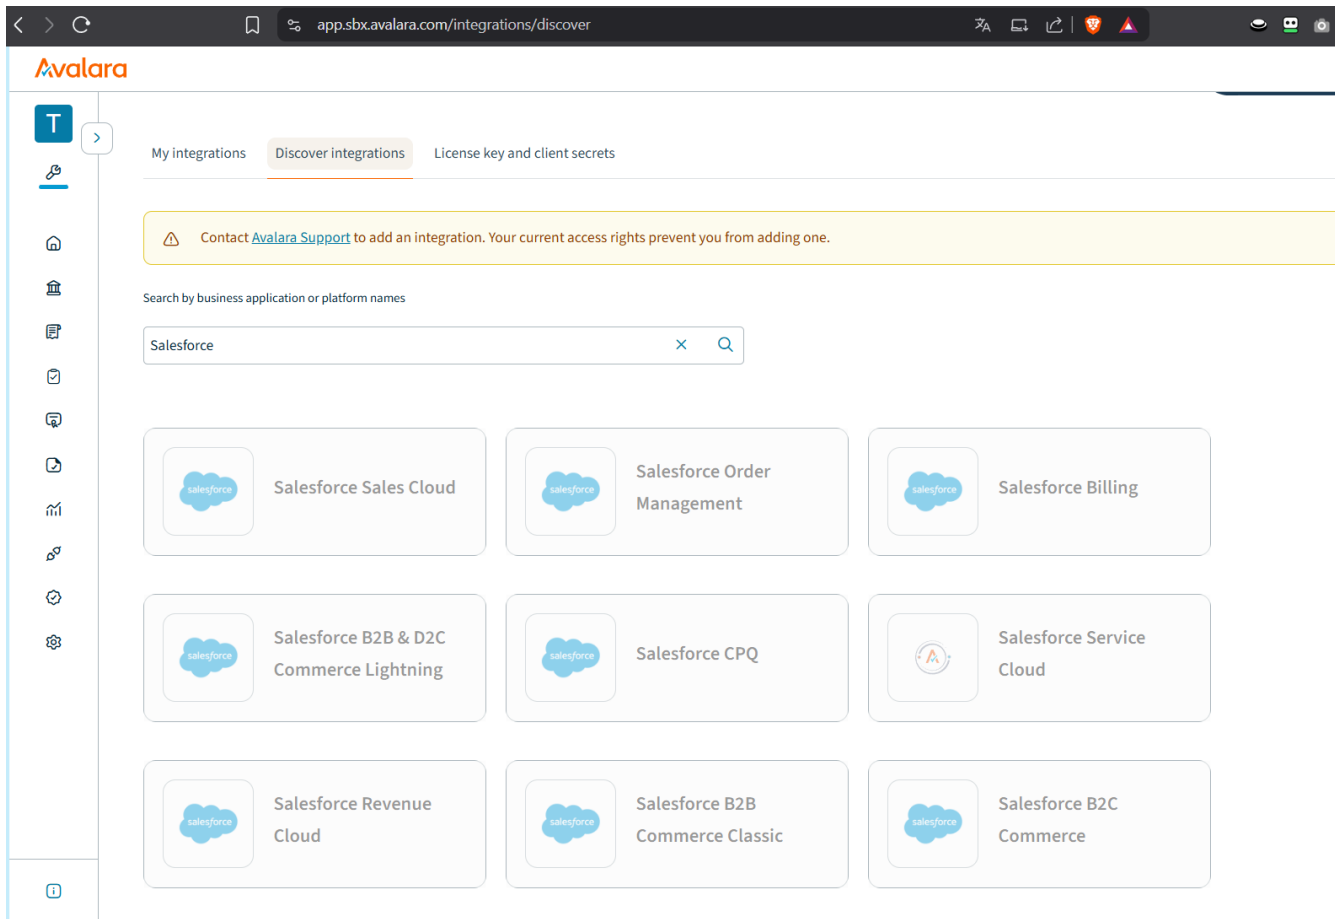

URL Access: <https://sandbox.admin.avalara.com/>
Account ID 2000002768

Account name The Clearing House Payments Company L.L.C.

Only API is set as an available integration

Maybe having Admin access can enable our user adding the necessary Salesforce connector. Otherwise, an Avalara comms/ticket will be
"Contact [Avalara Support](#) to add an integration. Your current access rights prevent you from adding one."

After the connector has been enabled proceed following this [guide](#) and the uploaded AvaTax Mapper guide.

[@TanyaR](#) We also still need a product list from Stephanie

6 . **Tanya Renne** April 30, 2026 at 16:13

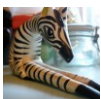

Reforwarded the email she sent to the two of us Feb 27. [@NolanB](#)

7 . **Nolan Burke** April 30, 2026 at 16:16

[@TanyaR](#) Got it.

To Rodolfos point, do you believe we can get admin access here so we can setup the connector or do we re-analyze from the API standp API was what was being asked but not sure if that can change.

8 . **Tanya Renne** April 30, 2026 at 16:17

I've made the request about access already
