

Enable and Configure Spark Plugs

How-to Guide

Spark Plug Extension Points enable the inclusion of custom Lightning Components into default Fonteva process flows. To use Extension Points, developers must create and enable Custom Metadata Type records under the **Spark Plug Extension** heading in **Setup > Custom Metadata Types**.

Prerequisites

- Extension Point availability depends on the org's Fonteva release. Refer to the [Spark Plug Extension Points](https://fun.fonteva.com/s/article/spark-plug-extension-points) (<https://fun.fonteva.com/s/article/spark-plug-extension-points>) reference article for details on each available Extension Point and the required release.
- A developed Custom Lightning Component that will execute/display when the Extension Point is engaged.
- If using the **Add_Validate_Address_Btn** Spark Plug Extension, activate the "Enable ability to use a 3rd party address validation system" Critical Update in **Spark Admin > Apps > Charge**.

Spark Plug Custom Metadata Setup

NOTE: If any of the fields indicated in this section do not display when creating the Custom Metadata Type record, you may need to [modify the page layout](https://fun.fonteva.com/s/article/modify-page-layouts-for-custom-metadata-Types) (<https://fun.fonteva.com/s/article/modify-page-layouts-for-custom-metadata-Types>) to add the appropriate fields.

1. Go to **Setup** (gear icon) and, in the **Quick Find** box, search for and select **Custom Metadata Types**.
2. In the **All Custom Metadata Types** list, select **Spark Plug Extension**.
3. In the **Custom Metadata Type Detail** section, select **Manage Spark Plug Extensions**.
4. Select **New**.

5. Complete the fields in the **Information** section:

- a. **Label** - Enter an appropriate label. Fonteva recommends using the same name as the Spark Plug Extension Point to be used. For example, enter *ApplyPayment* if using the *ApplyPayment* Extension Point.
- b. **Spark Plug Extension Name** - This field is auto-populated with the entry in **Label** above.
- c. **Spark Plug Extension Point** - Select the **Spark Plug Extension Point Lookup** icon and select the appropriate Spark Plug Extension Point from the list provided.

NOTE: The available Spark Plug Extension Points depend on the Fonteva release version for the org. The List of Fonteva Spark Plugs reference describes available Spark Plugs and their version requirements.

- d. (Optional) **Protected Component** - Select as appropriate.
- e. (Optional) **Extension Point enabled?** - Select to enable this Extension Point. Deselect to disable.
- f. **Lightning Component** - Enter the name of your custom Lightning Component to display.
- g. (Optional) **Execution Order** - Enter a positive integer that defines the execution order of this Extension Point. This is used when multiple components are displayed on the same Extension Point. 0 displays first, then 1, 2, etc.

6. Select **Save**.
