

Spark Plug Extension Points

Reference

Fonteva Spark Plugs enable the inclusion of custom Lightning Components into default Fonteva process flows through an Extension Point. This article describes the Extension Points and in which Fonteva release they are available.

Extension Point	Execution Point	UI Action	Notes
Fonteva Platform 15.1, and later.			
Load_ApplyPayment	Executed when the Apply Payment page is loaded.	Displays the Custom Lightning Component. When the Component requirements are satisfied, returns to the default Fonteva Apply Payment page.	Process this Extension Point using Fonteva's built-in functionality, either through <code>FDService.RefundService.getInstance().processRefund</code> or by setting the <code>OrderApi__Process_Refund__c</code> field to true.
Add_Validate_Address_Btn	Executed after the replaced "Validate" button is selected.	When this Extension Point is configured, a new "Validate" button is displayed on pages where address validation is required. When the new "Validate" button is selected, the Custom Component displays.	To use this functionality, the "Enable ability to use a 3rd party address validation system" critical update must be activated in Spark Admin > Apps > Charge .

Override_Tax_and_Shipping	Home (/s) Executed to override the Rapid Order Entry Tax and Shipping page.	Replaces the default Fonteva Tax & Shipping page with a Custom Lightning Tax & Shipping page, and then returns to the default Fonteva Apply Payment page.	See the Override Tax & Shipping Additional Information section below.
Process_Refund	Executed after the "Process Refund" button is selected.	Interrupts the default Fonteva Refund process for the custom Lightning Component. When the component's requirements are met, the Refund process continues.	
2018-R2, and later.			
On_Click_Add_to_Order	Executed after the "Add To Cart" button is selected.	N/A	
Load_Shopping_Cart	Executed when the Shopping Cart page is loaded.	N/A	
Load_Checkout	Executed when the Checkout page is loaded.	N/A	
Load_Invoice_Payment	Executed when the Invoice Payment page is loaded.	N/A	

Load_Payment_Confirmation	Executed when the Home (/s/) confirmation page is loaded to show the receipt.	N/A	
---------------------------	---	-----	--

Override Tax and Shipping Additional Information

- When using this extension point, it is required to redirect to Fonteva's Apply Payment page after completing the custom tax and shipping page.
- Do not use the Fonteva Tax and Shipping fields to track custom Tax and Shipping information. If custom Tax and Shipping forms are used, ensure custom Tax and Shipping fields are created and referenced.
- Fonteva's Lightning Checkout Page can be configured to replace the default Fonteva Tax & Shipping page with a Custom Lightning Page. Create a Custom Metadata entry under **Setup > Custom Metadata Types > Fonteva Registry Entry** - an example and notes are below.

Fonteva Registry Entry Detail

EditDeleteClone

Label	customShipping2	Protected Component	☐
Fonteva Registry Entry Name	customShipping2	Namespace Prefix	qa53922
Entry Key	qa53922__Sales_Order_Line__c	Entry Category	customShipping
		Entry Value	qa53922__Is_Avalara_Tax__c
		Is Enabled	☒
Created By	OrderApi_DevOrg, 5/24/2024, 3:21 AM	Last Modified By	OrderApi_DevOrg, 5/24/2024, 6:54 AM

- In **Label**, enter an appropriate label to name this Custom Metadata Entry. For example, **customShipping**.
- The **Fonteva Registry Entry Name** will auto-populate based on the entry for **Label**.
- In **Entry Key**, enter the sObject name of the controlling field: either OrderApi__Sales_Order__c or OrderApi__Sales_Order_Line__c or any other sObject that contains the OrderApi__Sales_Order__c field.
- In **Namespace Prefix** (if displayed), leave this field blank.
- In **Entry Category**, enter **customShipping**
- In **Entry Value**, enter a custom Boolean field that when true (populated), the shipping address will display on the Lightning Checkout page.
- (Optional) Select **Is Enabled** to execute the **Extension Point** and display the Custom Lightning Component.
