Create a Tax Class

How-to Guide

Tax Classes are set up through the Item Class record and will group tax rates together through their related Tax Class.

An Item Class can be created for various different categories, and the record displays sections to configure all of these different types of Item Classes. For Taxes, you will only need to populate the Information and Tax Class Configuration sections, as highlighted in the images below.

Create a Tax Class

1. From the Item Classes tab page, select the **New** button. The **New Item Class** modal will open.
2. In the **Information** section, type the name of the Item Class in the **Name** field.
3. In the **Business Group** field, select the Business Group that the Item Class will be connected to.

Home (/s/)

Item Class Attributes

Save

5. In the **Tax Class Configuration** section, check the **Is Tax** checkbox.

Home (/s/) Search GL Accounts...

Tax Class Configuration

Is Tax ☒ Use Default Tax Rate ☐

Taxable Items

Is Taxable ☐ Tax Class Search Item Classes...

Inventory Details

Enable Item Class Inventory ☐ Enable Assignment Inventory ☐

Available Inventory Assignment Inventory

Sold Inventory Active Assignments

Deferred Revenue

Defer Revenue ☐

Deferred Revenue Account Search GL Accounts... Revenue Recognition Date

Revenue Recognition Rule --None-- Flex Day of the Month

Cancel Save & New Save

6. Select the **Save** button.

Your newly created Tax Class will display on the Item Class record in the Item's related list with the Default Tax Rate following the name. The default Item Price will be 0.00. Each Tax Class can only have one Default Tax Rate. Learn how to configure a Tax Rate for your Tax Class next.
