Taxes

Topic Outline

Taxes are applied at the Item level and displayed at Checkout and on the Sales Receipt once an Item has been purchased. Taxes are configured through Locales and/or Tax Rates in the Staff View.

Admins must configure Organization Default Tax Settings

(<https://fonteva.atlassian.net/wiki/spaces/TTS/pages/1631027441/Managing+Tax+Default+Settings>) and designate the GL Account for Tax Liabilities (<https://fonteva.atlassian.net/wiki/spaces/RI/pages/1560870913/Adding+a+Chart+of+Accounts>) prior to setting up taxes on the Item record level. Optionally, you can enter the necessary API Names into the Required Tax Fields (CSV) field on the related Business Group record in order to allow staff users to configure the required tax fields on the Checkout page.

Taxes are composed of four primary components and must be configured in the order below:

1. Tax Class
2. Tax Locale
3. Tax Rates
4. Taxable Items
